## Inside the A780

The Motorola A-780 is a must-have for professionals who are constantly on the go, whether at work or at play. While it may look like a traditional handset, the A780 opens to expose the color touch screen. The advanced MOTOSYNC feature allows users to synchronize corporate email, contacts and calendars over-the-air. Thanks to its large 240x320 TFT color touch screen, effortless work and play are just a tap away.

### Software Features

The Linux-based Motorola A780 comes equipped with the ability to view PDF, Microsoft Word, Excel, and PowerPoint documents with ease. In addition, the OPERA browser allows instant internet access. The ability to support EDGE networks provides up to three times the data speed of GPRS mobiles, providing faster browsing speeds. Because of the speaker independent voice dial, the A780 ensures the ability to execute any phone call through voice recognition.

### Boredom Be Gone!

Go from hard-at-work to hard-at-play with the many mobile entertainment features the Motorola A780 has to offer, including MP3 playback capability, 1.3 megapixel camera/camcorder with full-screen viewfinder and 3D Java games. The Motorola A780 satisfies your mobile entertainment needs.
